PROMOTING EARLY CHILDHOOD DEVELOPMENT
Wayie ne Nyithindo!

The development of a child is part of good health

3 Months
- Follows objects with eyes
- Turns head toward sounds
- Holds head upright
- Smiles when you speak
- Reaches for objects

6 Months
- Babbles
- Rolls over
- Tries to get things out of reach
- Responds to caregiver emotions

9 Months
- Sits without support
- Picks up objects with two fingers
- Imitates sounds and gestures of caregiver
- Responds to own name

1 Year
- Crawls and stands without support
- Says first words, waves “bye-bye”
- Searches for hidden objects
- Points to objects

18 Months
- Walks supported by hand
- Says 2–3 words
- Feeds herself/himself with a spoon
- Begins to point to body parts

2 Years
- Uses short sentences
- Responds to requests
- Builds towers of 4 or more blocks
- Imitates actions of adults

3 Years
- Plays with other children
- Pretends to feed the doll
- Groups similar objects
- Begins to dress and undress by her/himself
- Says first name and tells a short story

Talk to your doctor, nurse, or CHW to learn more about your child’s healthy development
